**OFFICE ACTION**

***Election/Restriction***

1. Claims 1-23 are pending in this application.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

(A) Claims 1-18 and 23-25, drawn to a method for inspecting a wafer, classified in class 250, subclass 310;

(B) Claims 19-22, drawn to an apparatus for inspecting a wafer, classified in class 324, subclass 750

2. Inventions (claims 1-18 and 23-25) and (claims 19-22) are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)).

In this case: (Group B compared to Group A) the defect analyzing means for detecting a defect of a wafer, in an inspecting apparatus, can be detected not only by analyzing a signal generated from a signal processing means (which is found in Group A and B), but also by analyzing or comparing reflecting signal(s) to an ideal (or standard) signal, by analyzing voltage and/or current generated by a signal beaming, and by many other techniques (which is silent in Group A).

3. Applicant is advised that the reply to this requirement to be completed must include an election of the invention to be examined even though the requirement is traversed (37CFR 1.143)
